ROOFING & EXTERIORS

Does moss damage your roof?

Yes! Remove it to stop lifetime damage to your roof.

How to remove moss from your roof:

1. Climb

SAFELY Get on your roof.

2. Inspect

Check and make sure none of the shingles or under layer of the roof are damaged.

3. Wash & Scrub

Get rid of that moss as best as possible, **WITHOUT DAMAGING SHINGLES OR ROOF MATERIALS.**

4. Sanitize (Optional)

Purchase or make "Moss spray" and apply to the roof to help remove moss, and prevent re-growth.

5. Cut & Remove

Remove anything that might be creating a favorable environment for moss to grow: tree branches, leaves, standing water.
